Summary of Information

Site is a location on a high bluff or cliff overlooking a coast line. In the immediate vicinity is a wooden-frame structure with weathered white-painted siding. The structure seems old and not well kept up. The way down to the water is very steep, and at the bottom the waters edge is line with large rocks upon which waves crash with a good deal of force. Access to the land here from water craft is very difficult. There does seem to be a rock jetty or breakwater here, but it seems more to be intended for erosion control than boat-landing. It is very stormy at present, with low scudding clouds and a stiff wind. The water is very rough. Result of dowsing indicated two points on coast—one in the northern portion of Redwood National Park, the other in the vicinity of Rockport, both in California.

TASKING SHEET

February 7, 1990 (Wednesday)

DOWSING TASKER

1. EEI: The customer desires to know three locations. These locations are called TARGETS A, B, & C for the purpose of this dowsing. Each target represents specifically tasked EEI.

- a. Locate TARGET A on the dowsing page, provided.
- b. Locate TARGET B on the line which is on the dowsing page.
- c. Locate TARGET C on the line which is on the dowsing page.

2. Clearly mark and label your location for each target, and return the sheet to 018 for collation.
